

UTKARSH KHER

Full Stack Developer

Bangalore, India

kherutkarsh54@gmail.com | +91-6205052231 | LinkedIn | GitHub | LeetCode

SUMMARY

Full Stack Developer with strong experience in Java, Spring Boot, React, and backend API development. Proven ability to build scalable web applications, RESTful APIs, and database-driven systems. Solid foundation in Data Structures, Algorithms, object-oriented programming, and software engineering best practices.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Frontend: React, HTML, CSS, JavaScript

Backend: Spring Boot, Node.js, Express.js, RESTful APIs

Databases: PostgreSQL, MySQL, MongoDB, SQL

Tools and Technologies: Git, GitHub, Docker, Kubernetes, CI/CD Pipelines

Concepts: Object-Oriented Programming, Data Structures, Algorithms, API Integration, Agile Development

Operating Systems: Linux (Ubuntu, Kali Linux, RHEL)

PROJECTS

TalentLens Platform — AI Powered Secure Assessment System (React, Spring Boot, PostgreSQL) 2026

- Built secure AI-powered online examination and assessment platform using React frontend and Spring Boot backend.
- Implemented authentication, protected exam workflows, and automated evaluation features for reliable performance.
- Integrated AI-based suspicious activity detection to maintain exam integrity and platform reliability.
- GitHub Repository

Asynchronous Table Profiling Microservice (Node.js, Express, PostgreSQL, Redis, Docker) 2026

- Implemented an async profiling pipeline: REST APIs to submit jobs and retrieve structured JSON profiles, BullMQ workers on Redis so profiling runs off the request path, and PostgreSQL for request metadata and stored results.
- Containerized API, worker, database, and cache with Docker Compose for repeatable local and demo deployments.
- Added optional AI-enriched summaries on top of deterministic column statistics, plus an MCP (stdio) tool surface (`profile_table`, `get_profile`, `list_profiles`) that mirrors the HTTP contract for agent-driven workflows.
- GitHub Repository

Event Ticket Platform with QR Code Verification (React, Spring Boot, PostgreSQL) 2025

- Developed full stack web application using React frontend and Spring Boot backend RESTful APIs efficiently.
- Implemented authentication, authorization, and secure API integration workflows for organizers and registered users.
- Designed relational database schema and optimized SQL queries for better performance and scalability.
- GitHub Repository

EXPERIENCE

DocuPro (SDE Intern) June 2026 – Present

- Developing features for a visa document-processing console built on Next.js 15, TypeScript, Prisma, and PostgreSQL, including RBAC-protected dashboard workflows for request intake and processing stages.
- Building the customer-facing document-advisor chatbot: multi-step conversational flows for visa document guidance, eligibility checks, and in-chat document uploads, integrated with WhatsApp messaging and a knowledge base.
- Implementing Zod-validated APIs and React server components with NextAuth OTP authentication, following typed error-handling, testing, and code-review practices.

Leadics (SWE Intern) March 2026 – Present

- Contributed to software features in a team environment using Git, code review, and testing practices.
- Collaborated on backend and API work to improve reliability, maintainability, and product quality.

Placement Volunteer, RNS Institute of Technology 2024–2025

- Coordinated campus placements and guided students in coding preparation and interview readiness.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering (Cybersecurity)

RNS Institute of Technology, Bangalore CGPA: 8.8 / 10

2022 – 2026

CERTIFICATIONS

- AWS Cloud Security — FutureSkills Prime (NASSCOM, Government of India)
- Cisco Networking Academy — Introduction to Cybersecurity

ACHIEVEMENTS

- Secured **1st Rank** at Project Open House Panorama (PROP) for GPS Spoofing Project
- Solved 200+ Data Structures and Algorithms problems on LeetCode
