

UTKARSH KHER

kherutkarsh54@gmail.com | +91-6205052231 | LinkedIn | GitHub | LeetCode

SUMMARY

Cybersecurity student skilled in **penetration testing, network security, Linux hardening, and DevSecOps**. Experienced in **ethical hacking, vulnerability assessment, and automation** using Python, Bash, and security tools. Certified in EC-Council Linux Security and Advanced Ethical Hacking. Proficient with Wireshark, Nessus, Burp Suite, and Docker security.

EDUCATION

RNS Institute of Technology

B.E. in Cybersecurity; CGPA: 8.73/10

Bangalore, India

2022 – 2026

TECHNICAL SKILLS

Penetration Testing: Nmap, Metasploit, Hydra, Nikto, Nessus, Burp Suite

Security: Network Security, OWASP, Linux Hardening, Vulnerability Assessment

DevSecOps: Docker, Kubernetes, Ansible, CI/CD Security, OpenShift

Programming: Python, Bash, Java, JavaScript, C, C++

OS: Kali Linux, Parrot OS, RHEL

Monitoring: Wireshark, Snort, Log Analysis, Security Audits

Tools & Others: Git, GitHub, JIRA, Jenkins, AWS (Basics)

EXPERIENCE

- **DocuPro — SDE Intern** June 2026 – Present
 - Developing features for a visa document-processing platform built on Next.js 15, TypeScript, Prisma, and PostgreSQL.
 - Implementing RBAC-protected dashboard workflows and NextAuth OTP authentication for secure access control.
 - Building the customer-facing document-advisor chatbot: conversational flows for visa document guidance, eligibility checks, and in-chat document uploads, integrated with WhatsApp messaging.
 - Applying Zod input validation and typed error handling to keep APIs secure, testable, and reliable.
- **Leadics — SWE Intern** March 2026 – Present
 - Contributed to software features in a team environment using Git, code review, and testing practices.
 - Collaborated on backend and API work to improve reliability, maintainability, and product quality.
- **Placement Volunteer, RNSIT** 2024 – Present
 - Conducted workshops on secure coding and cybersecurity interview preparation.
 - Mentored peers on penetration testing and security best practices.
 - Organized CTF competitions and knowledge-sharing sessions.
 - Assisted in setting up cybersecurity labs for students.

PROJECTS

- **Penetration Testing on Automotive Systems – GPS Spoofing — Python, Kali Linux** Dec 2024
 - Simulated GPS spoofing attacks on RC car navigation to demonstrate vulnerabilities.
 - Developed Python-based NMEA signal generator for controlled testing.
 - Executed penetration testing with Nmap, Metasploit, and Wireshark.
 - Proposed anomaly detection mechanisms for GPS signal validation.
 - Documented attack scenarios and mitigation strategies for future reference.
 - Presented findings to peers to enhance understanding of automotive security risks.
- **Secure Ticketing Platform with QR Validation — Spring Boot, PostgreSQL** Jan – Feb 2025
 - Built a secure ticketing platform with QR-based authentication.
 - Implemented role-based authentication and encrypted sensitive user data.
 - Developed REST APIs for ticket issuance, validation, and monitoring.
 - Conducted penetration testing using OWASP methodology.
 - Performed load testing to ensure platform scalability and reliability.
 - Deployed platform in cloud environment for real-world testing.
- **Network Packet Analyzer — Python (Scapy)** Nov – Dec 2024
 - Developed tool for real-time network traffic capture and analysis.
 - Implemented filtering, inspection, and automated reporting of suspicious packets.
 - Visualized traffic patterns to support penetration testing exercises.
 - Added alerting mechanism for unusual traffic patterns using Python scripts.
 - Optimized performance to handle high-volume network traffic efficiently.

CERTIFICATIONS & ACHIEVEMENTS

- Ethical Hacking (Advanced), Linux Security (EC-Council), Docker & Kubernetes.
- Python – 5 (HackerRank).
- Solved 200+ DSA problems on LeetCode.
- Certified in AWS Cloud Foundations (Basics).
